Business Insights through Data Analysis

Building through Learning...

Program Overview

In today's world data flows everywhere and is collected from multiple sources like spreadsheets and databases and even things like IOT devices and mobile platforms, but making sense of the data and communicating it to others is not an easy task. Business executives today want to hear and see the results in a way that is more efficient and engaging as possible. The Business Insights through Data Analysis course will provide the participant with a deeper knowledge and better understanding of how to handle and present the data at hand for a better and more educated decision making process.

Content

In this data analysis and statistics course, you'll discover effective strategies and tools to master the process of interpreting and communicating your data analysis. This course will empower you with proven business analytic methods and boost your confidence for effective communication of insights.

The course contains 9 modules which are as follows:

- **Why Decision Making? Role of business intelligence?**
- **Who are involved? Internal Staff or Customers?**
- **Decision making process**
- **Asking the Right Question?(data scales)**
- **Identifying the Key Variables and Factors.**
- **Types of Data and Scales: Quantitative Vs. Qualitative**
- **How to get the data? Primary vs. Secondary**
- **Understanding our Data using excel:**
